

MALARIA & VECTOR- BORNE DISEASES

IN HUMANITARIAN CRISES

- ✓ Neglected
- ✓ Misunderstood
- ✓ Overlooked
- ✓ **Controllable**

12TH - 16TH SEPTEMBER 2016
MOMBASA, KENYA

INTENSIVE 5 DAY TRAINING COURSE

The MENTOR Initiative

The MENTOR Initiative is a not for profit organisation with over 9 years of experience in carrying out evidence-based disease control programmes and building capacity in malaria and vector borne disease control globally. To date, over 1000 individuals from NGOs, national partners, UN agencies, donors, suppliers and the media have participated in MENTOR's training programmes.

During this course you will learn to identify risk factors and understand the epidemiology and principle prevention, case management, surveillance and monitoring tools useful for diseases transmitted by mosquitoes, sandflies, snails, mites, ticks and more.

This course is aimed at providing key skills required to identify needs, and develop, prioritise and implement evidence based control programmes for vector borne diseases.

VECTOR BORNE DISEASES

Vector borne diseases are infections transmitted to humans principally by insects. This course has been specifically developed to strengthen the capacity of agencies to implement effective and coordinated malaria and vector borne disease control activities, either as a focus or as part of broader disease control activities.

While vital, the focus in combating malaria has often overshadowed the needs of communities afflicted with other vector borne diseases which frequently cause significant suffering and can cause high mortality too. Additionally, the onset of climate change, habitat loss and changes in land use have, in some cases, influenced the rapid spread of other vector borne diseases, such as dengue fever. These circumstances and subsequent outbreaks are exacerbated during humanitarian crises, when communities are at risk from many infections and are often exposed to multiple disease vectors. Often minor adjustments to existing programmes can significantly reduce the suffering endured by vulnerable populations because of flies or disease vectors at this time.

12TH - 16TH SEPT 2016
MOMBASA, KENYA

FEES

1950 USD
1650 USD (NGO rate)
900 USD (Full Time Student)

NOTE:

Fees include training costs for 5 full days (from 8h30 – 18h00 daily):

-accommodation for the 5 nights (starting Sunday night)

- all meals during the workshop days (from Sunday evening dinner to Friday lunch)

Participants will be responsible for arranging their own travel for the duration of the workshop and all extra costs.

If you are interested in sponsorship opportunities or a particular aspect

of the training

please contact :

OUR GOALS

To identify risk factors and priorities during malaria and vector borne disease infections or outbreaks and gain an understanding of the epidemiology of different types of diseases.

Understand the principles of malaria and vector borne disease control including, as appropriate, surveillance and monitoring, case management (diagnosis, treatment and patient care) and effective personal and community protection strategies.

Be able to prepare and plan for effective priority interventions for the acute emergency context and modify programme approaches according to changes in the situation as the situation moves towards post emergency phase to reconstruction

Determine the most effective coordination of efforts with national and international partners to address crises.

Monitor and evaluate the impact of interventions.

Identify operational and technical problems requiring field research.

Identify and quantify project needs for proposal and budgeting development

IN 5 DAYS YOU WILL BUILD UP YOUR KNOWLEDGE AND CAPACITY TO EFFECTIVELY PLAN, IMPLEMENT AND MONITOR MALARIA AND VBD CONTROL IN THE COUNTRIES WHERE YOU SERVE

12TH - 16TH SEPT 2016
MOMBASA, KENYA

INTENSIVE 5 DAY TRAINING COURSE

SUFFERING AND DEATH DUE TO MALARIA AND VECTOR BORNE DISEASES
IN HUMANITARIAN CRISES IS CONTROLLABLE.

THE MENTOR INITIATIVE TRAINING WILL HELP YOU UNDERSTAND WHAT CAN BE
DONE TO SAVE LIVES IN EMERGENCIES.

12TH - 16TH SEPT
2016
